# About Company

- Transnet IT Solutions is a group of companies, which is professionally managed company since its inception.
- We provide turnkey solutions to Clients' requirements for Fire Detection, PA system, EPABX, BMS ,Networking Systems, data, Voice, Video and Security Integration. Our field of specialization includes Designing and Implementation of Projects like LAN & WAN CCTV IP Surveillance R-F Connectivity for

## Our Value

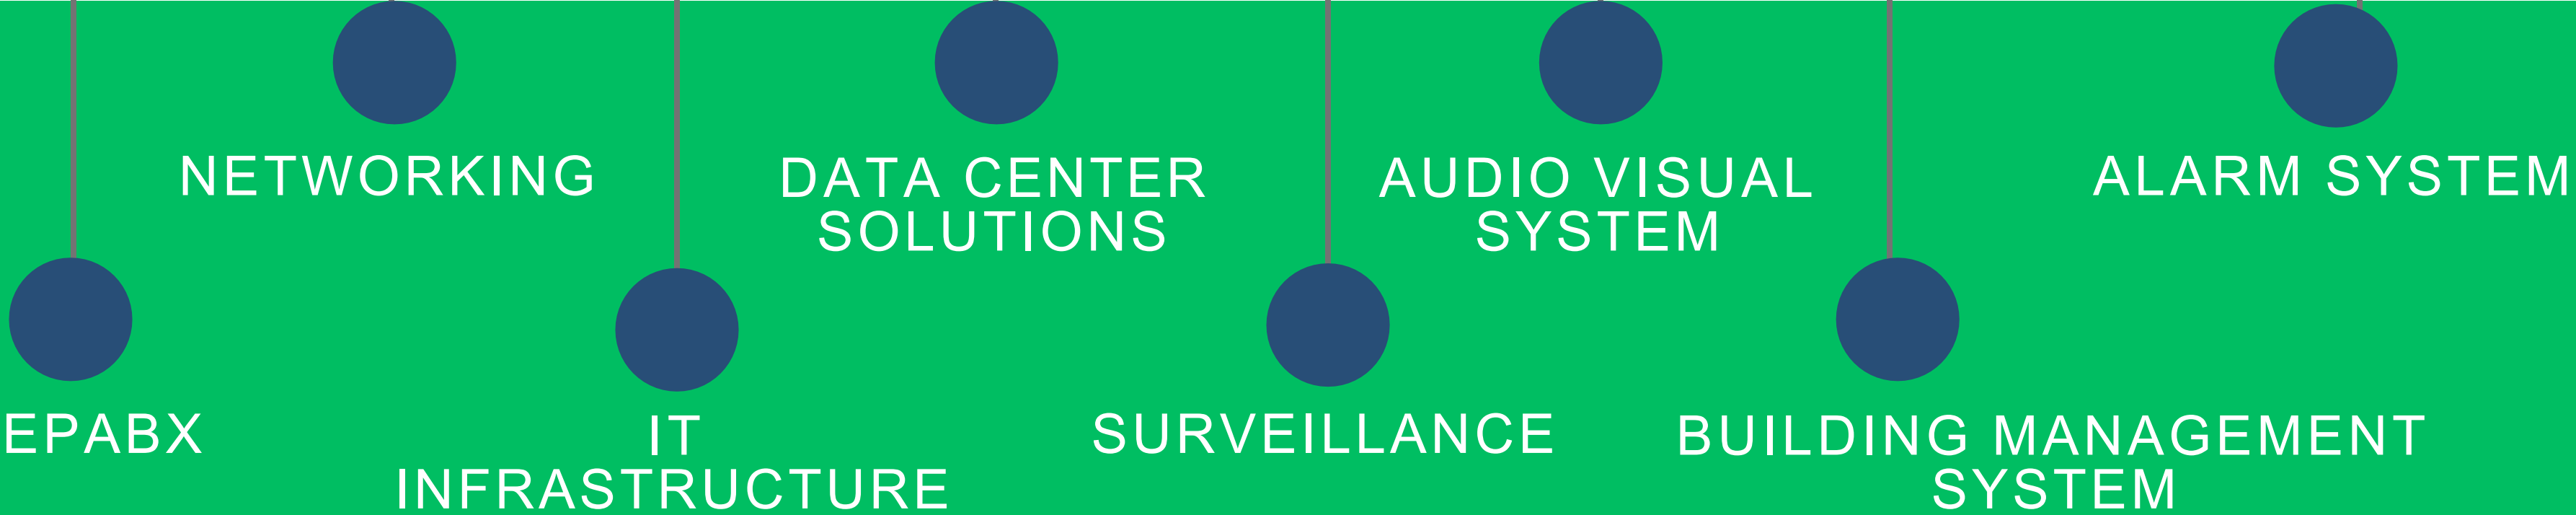

# Mission

---

We believe that customer satisfaction is achieved first, by carefully listening to our clients and studying their needs, second, by suggesting thoroughly studied solutions and agreeing on a plan and finally by executing the works in accordance with the set plan.

Our commitment to customer satisfaction and quality is a continuous journey towards improving the performance of our service and meeting whatever challenges that may confront.

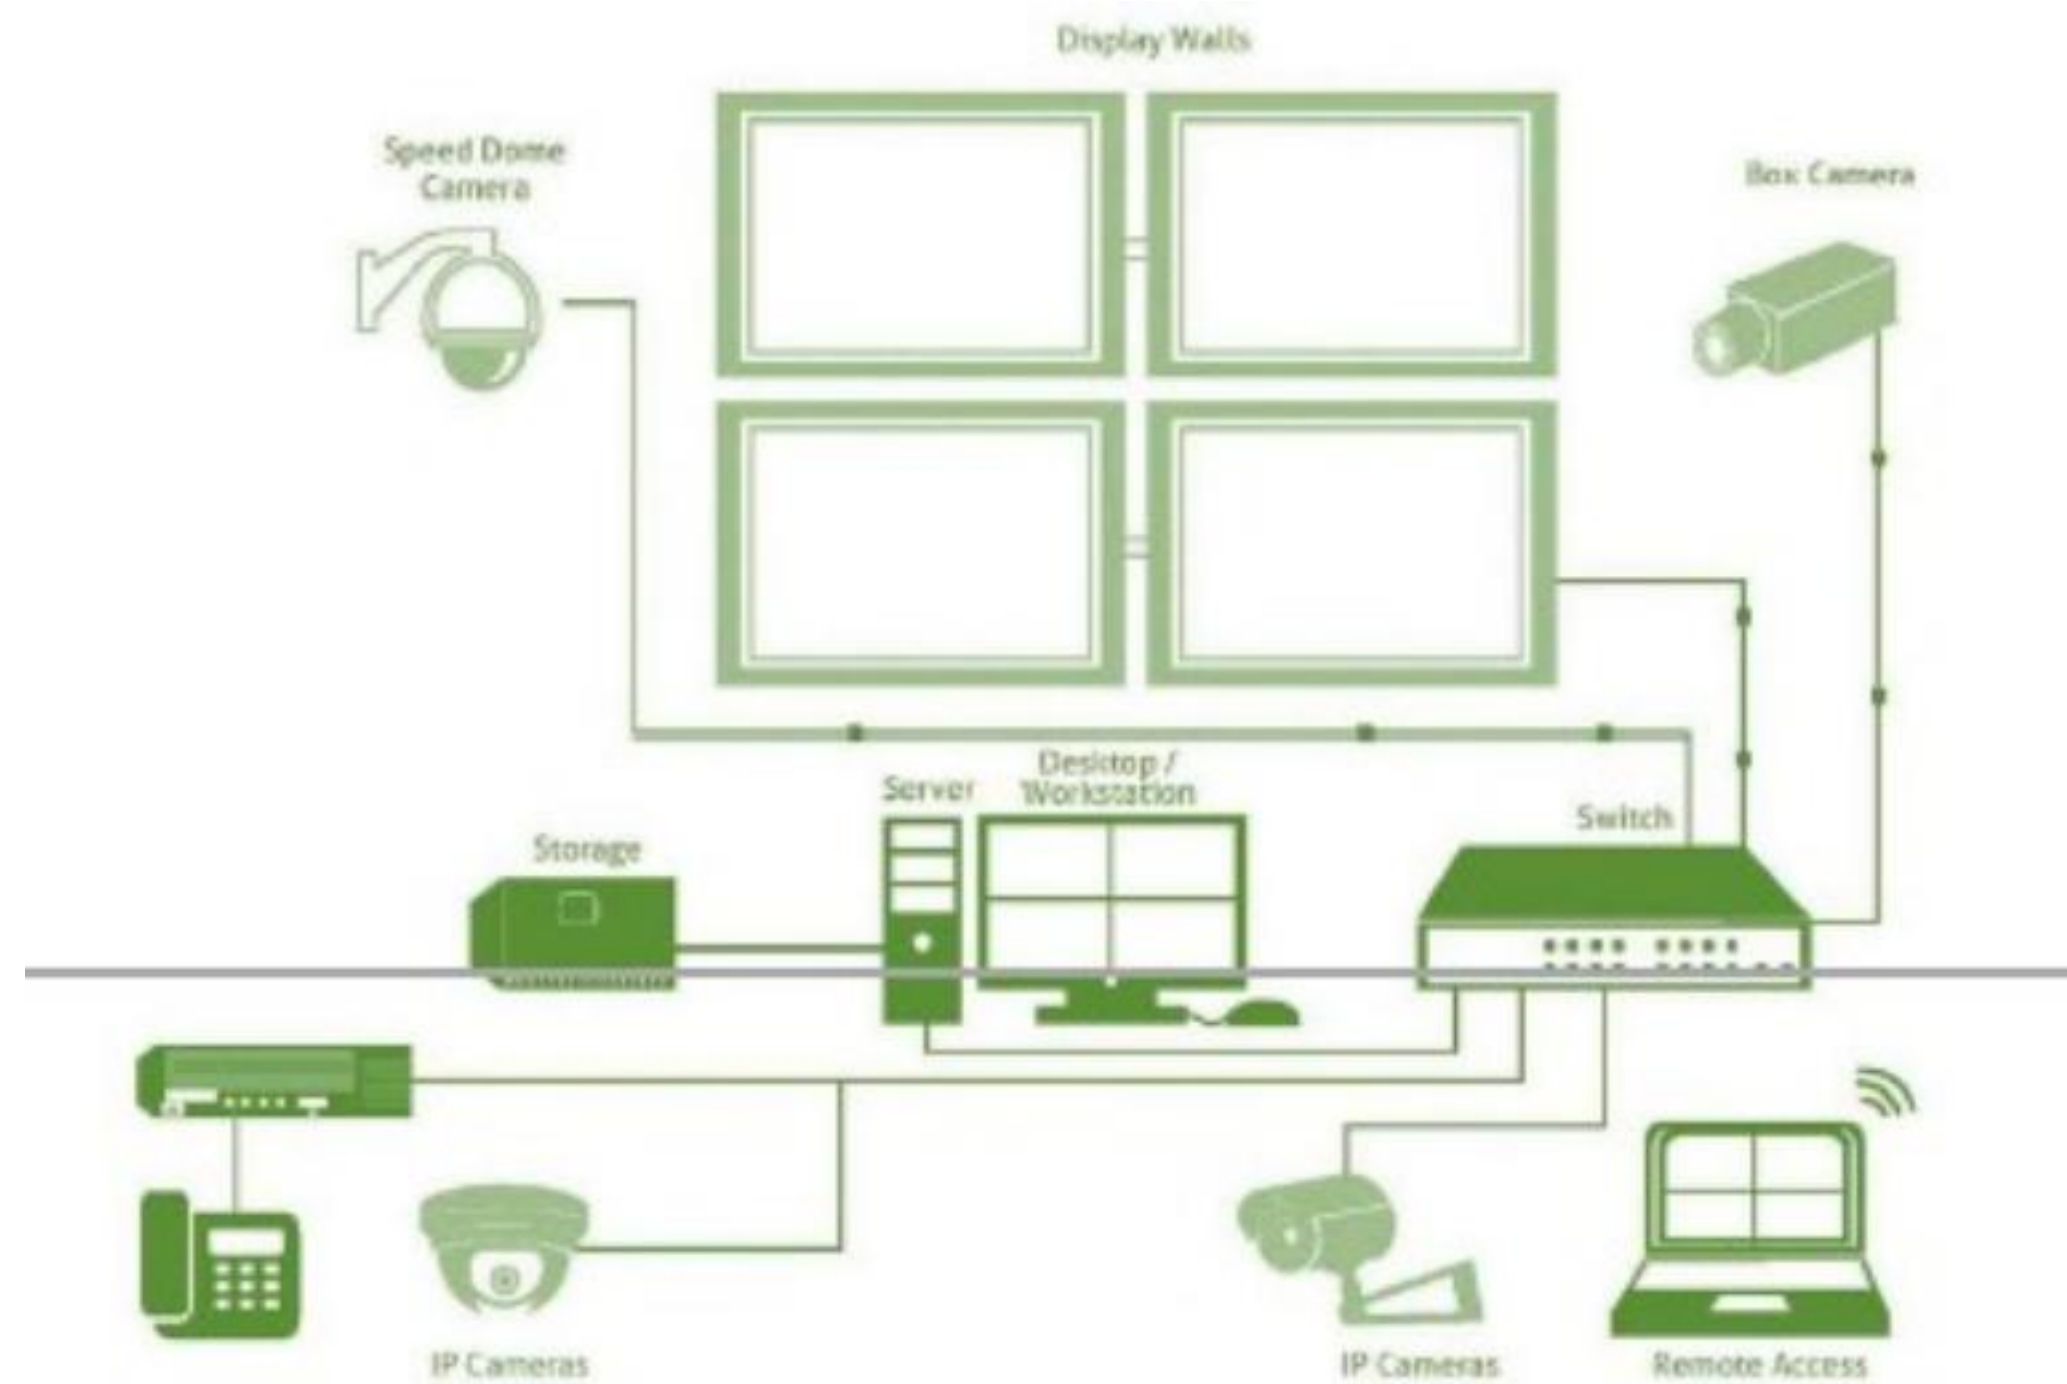

We are committed to exceed customer's expectations by providing better value and finding new cost-effective solutions for a better quality to business process.

# SURVEILLANCE

Total digital video and audio recording system that provides continuous CCTV recording, archiving and debriefing capabilities that meets the needs of today's demanding security environment.

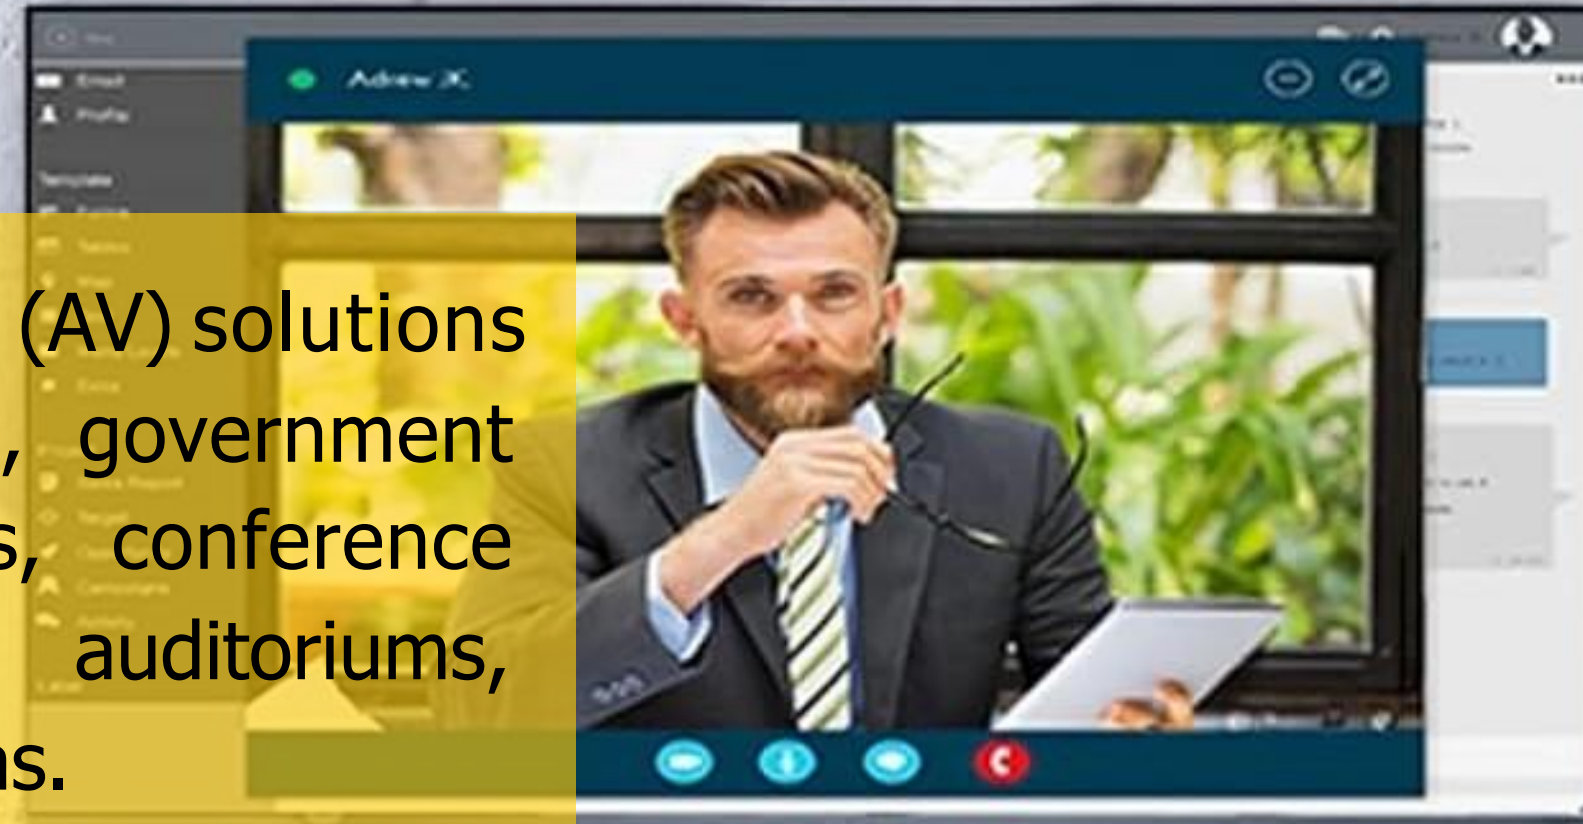

The complete solution for high level security. Alternatively the stand alone CCTV system which provides visual display of specific areas of plants or building.

# AUDIO VISUAL SYSTEM

End to end audio-video (AV) solutions for hospitality, corporate, government verticals for boardrooms, conference rooms, training rooms, auditoriums, seminar halls and cafeterias.

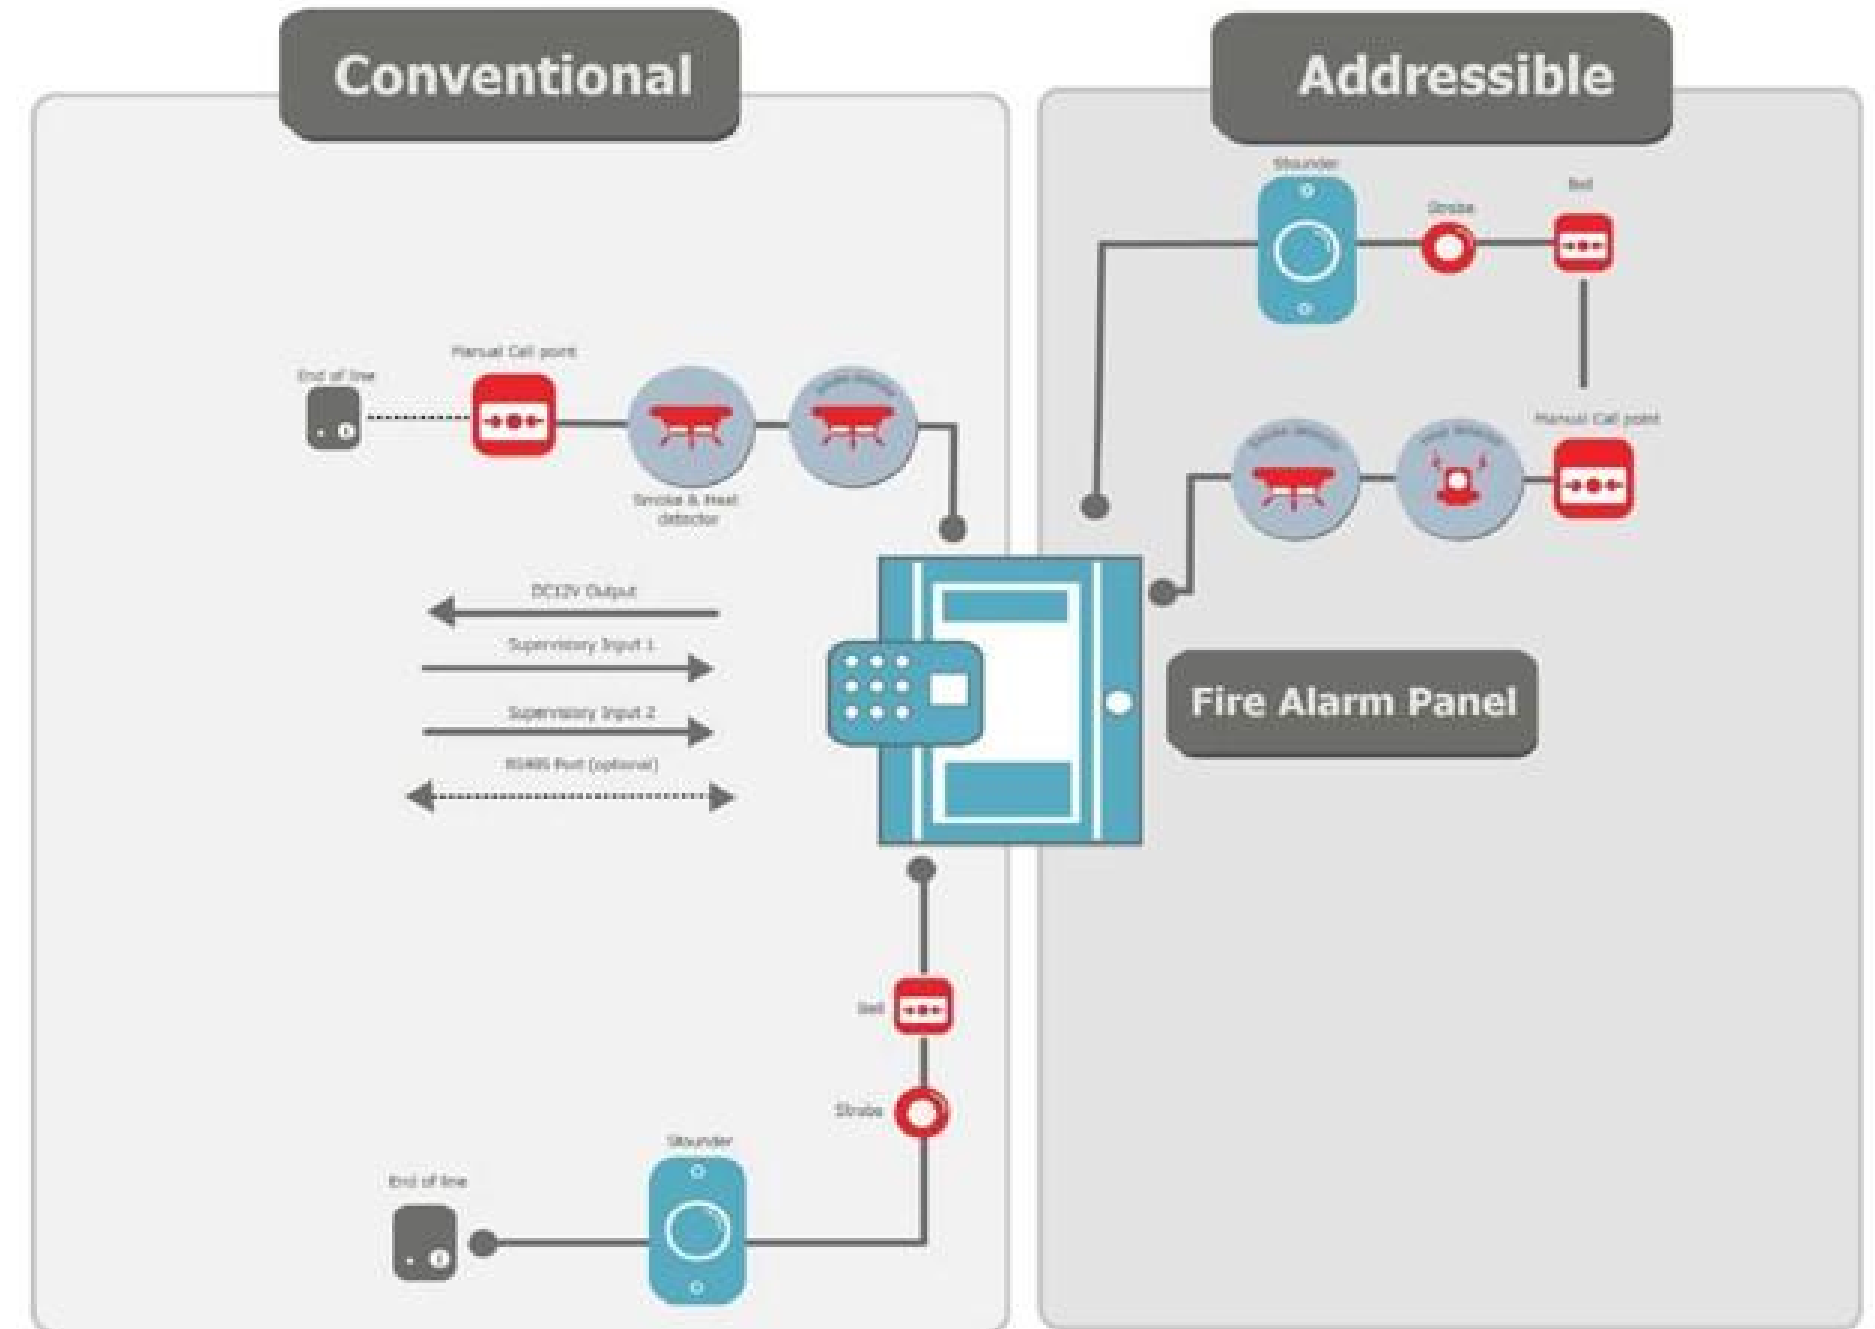

AV system design and project management automation and control digital signage.

# ALARM SYSTEM

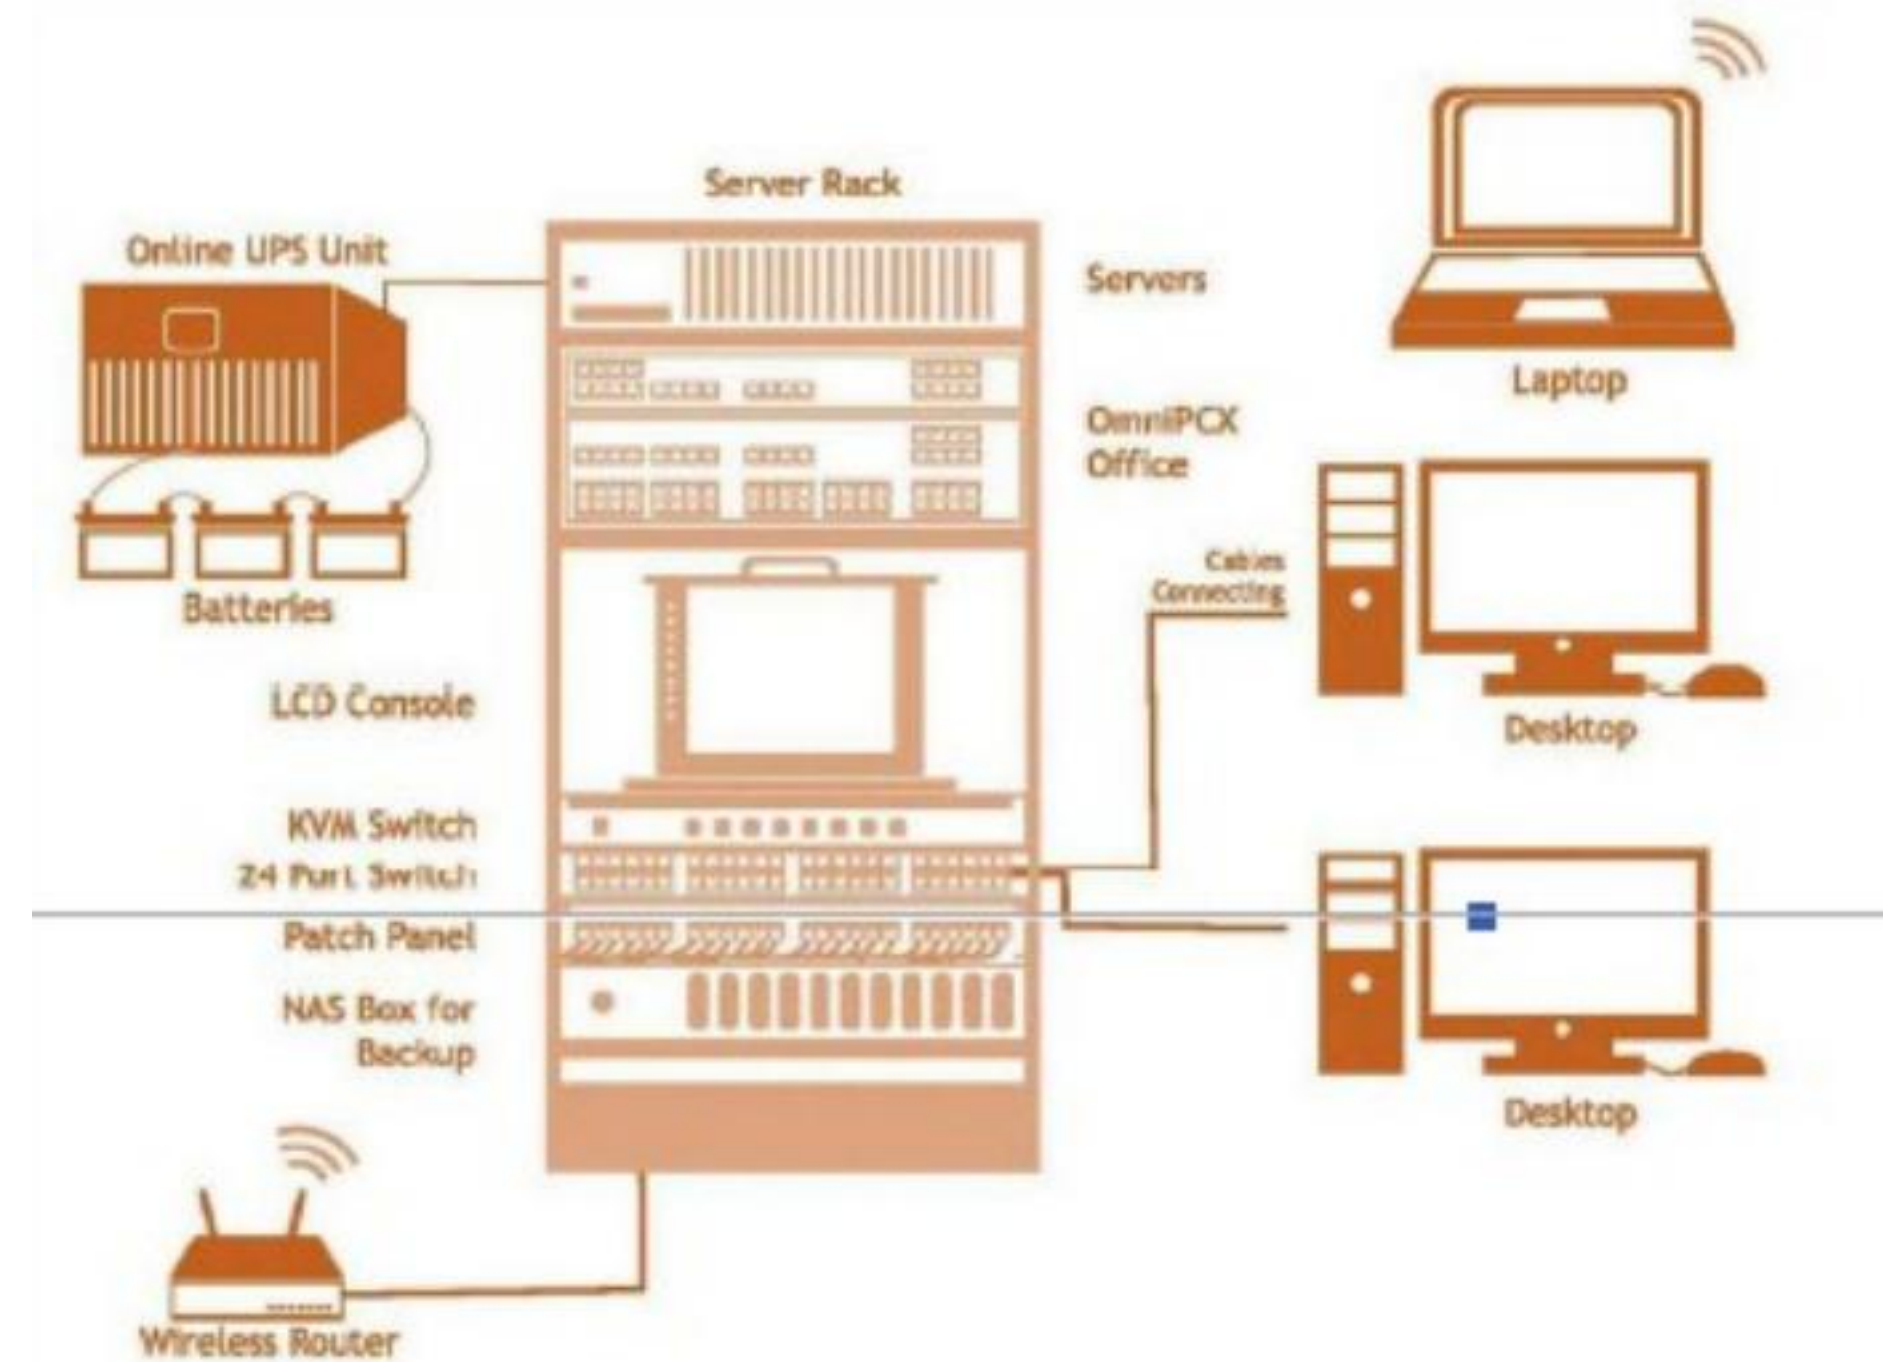

**A**nalogue addressable: single or multiples zones with high-level control of all devices on the system. Interfacing capabilities with other building system. PC interface with monitoring of alarm and fault conditions.

**C**onventional system: It consists of photoelectric, ionization smoke detectors and heat detectors, which are fully compatible with existing conventional panels.

# IT INFRASTRUCTURE

A single point solution with design and support for a wide range of networking devices including Routers, Switches etc. from some of the leading equipment manufacturers.

# EPBAX SYSTEM COMMUNICATION

At RDS Technexus, we specialize in providing advanced Electronic Private Branch Exchange (EPBX) communication systems designed to streamline internal and external voice communications for businesses of all sizes. Our EPBX solutions enable organizations to manage multiple phone lines efficiently, ensuring seamless connectivity across departments and with external clients.

Our systems are equipped with modern features such as call forwarding, call transfer, voicemail, automated attendants, and conference calling—helping businesses improve customer engagement, reduce operational costs, and enhance overall communication flow.

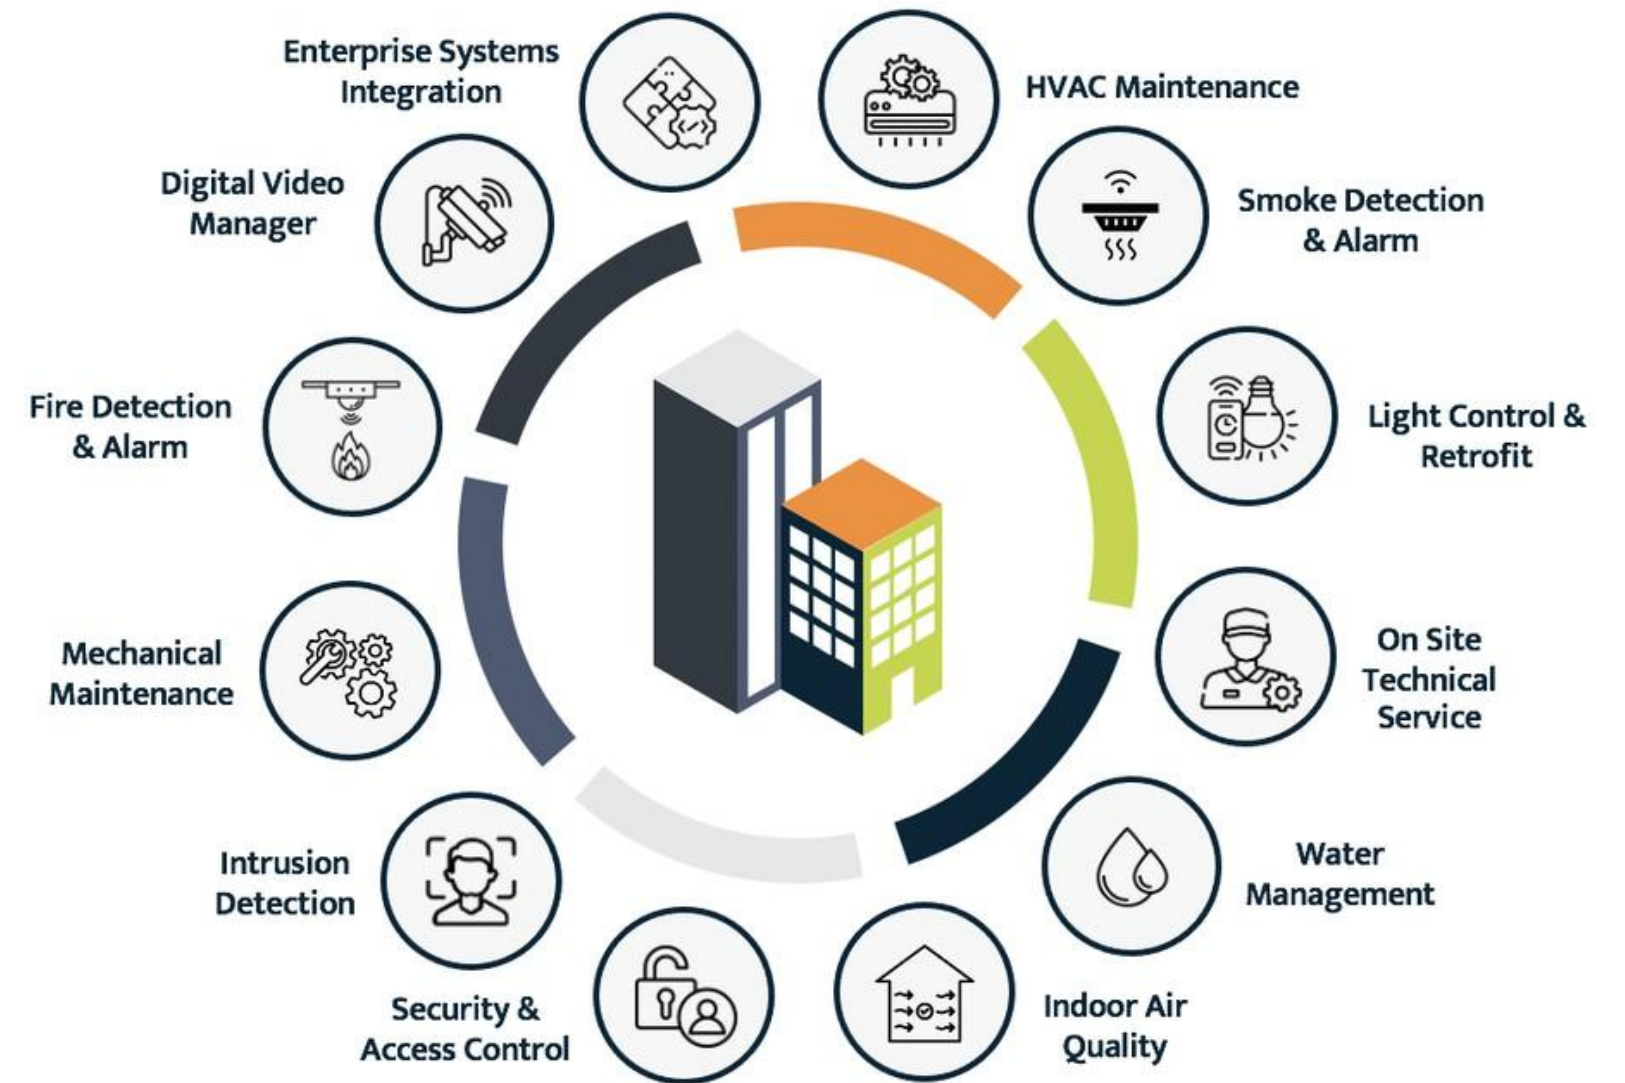

# BUILDING SYSTEM MANAGEMENT

A Building Management System (BMS) is a computer-based control system that monitors and controls various building systems like HVAC, lighting, security, and fire safety. Its goal is to improve energy efficiency, occupant comfort, and safety, while also reducing operational costs. BMS systems typically use sensors and actuators to collect data and adjust building operations in real-time.

We offer intelligent BMS solutions that integrate and automate key building functions such as HVAC, lighting, access control, energy monitoring, and fire safety. Our systems are designed to optimize operational efficiency, reduce energy consumption, and enhance occupant comfort and safety.

## Building Management System (BMS)

# ACCESS SYSTEM CONTROL

At RDS Technexus offers intelligent Access Control Systems designed to secure and manage entry to buildings, rooms, or restricted areas. These systems regulate who can enter or exit specific zones within a facility, ensuring enhanced security and controlled access at all times.

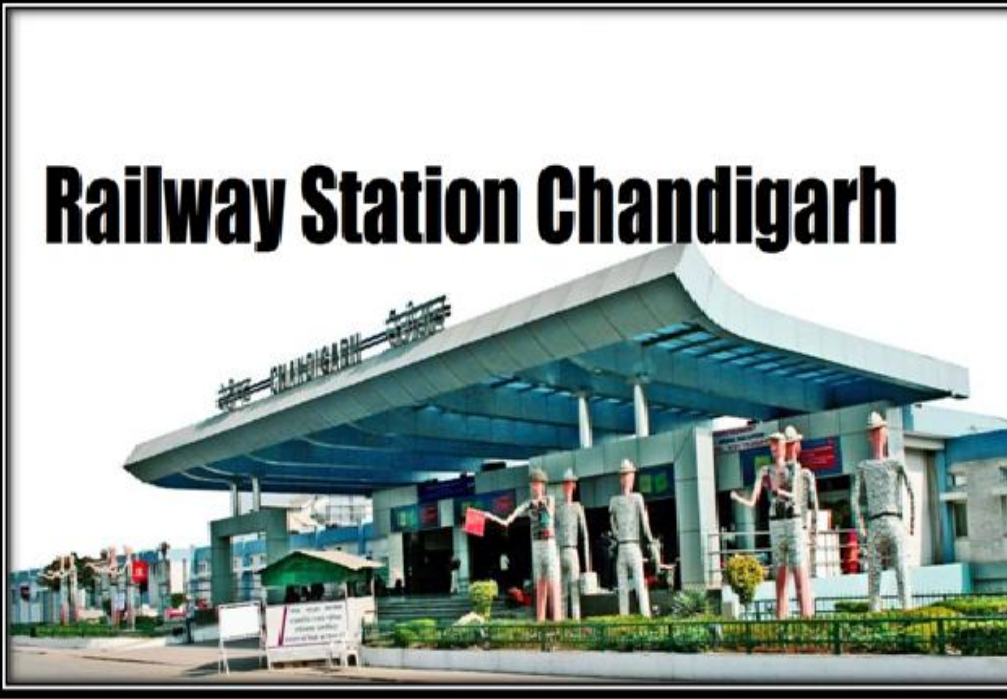

Our solutions include a range of technologies such as:

- Biometric Authentication (Fingerprint, Facial Recognition)
- RFID Card Readers and Smart Cards
- PIN-based Keypads
- Mobile Access via Smartphones
- Cloud-Based Access Management Platforms
